

Security – Shared Account Transition – Support Summary

Project: Shared Account Remediation

Location: Security Gatehouse / Factory Campus

Date: 16/09/2025

Prepared by: Paul Davidson

Account ID: security

Status: Implemented and Active

1. Purpose of Change

The legacy **security** generic account has been retired to align with audit, compliance, and security requirements.

The account has been migrated to the **Shared Accounts OU**:

OU=!Shared Accounts,OU=Factory,DC=williamsf1,DC=com

This provides **secure, auditable access** for designated security functions, while ensuring all staff have named logins for accountability.

This account covers **CCTV, badge printing, and access control systems** required for **24/7 site security**.

2. Overview of Changes

- Moved **security** generic account into Shared Accounts OU
- Maintained mailbox security@williamsf1.com
- Applied OU policies and login restrictions (scoped to Security Gatehouse

devices)

- Rolled out individual AD accounts to all security staff
 - ANPR system outsourced to third party; no longer supported in-house
 - Removed legacy local administrators (non-IT) from Security Gatehouse machines
-

3. Devices Using **security**

- **fact-avg01** – Dedicated CCTV workstation
- **W9442** – Gatehouse admin PC (CCTV, Easy Badge, Teams, Office Apps)
- **W9443** – Gatehouse admin PC (Teams, Office Apps, Email, Salto, Envoy)
- **iPads (x2)** – Envoy app access (unchanged)
- **iPhone** – MS Teams, dedicated security line

***Note:** ANPRPC (Automatic Number Plate Recognition system) is now **outsourced** and no longer under IT support.*

4. Shared Account Configuration

- **Account Name:** **security**
- **Password Policy:** 2MFA enforced
- **OU Path:**

OU=!Shared Accounts,OU=Factory,DC=williamsf1,DC=com

- **Email/Teams:** Mailbox maintained (security@williamsf1.com), Teams tag created for “**Security**”
-

5. Access Controls

- **MFA:** All access requires 2MFA approval via Keeper
 - **Device Scope:** Account restricted to **fact-avg01**, **W9442**, and **W9443** only
 - **Implementation:** Lockdown applied directly on the **security** AD object
 - **Support Note:**
 - If new security PCs are rolled out, device IDs must be **added as approved logon devices** within the account object
 - Failure to add them will **block security logins** on new machines
-

6. Drive and Application Access

Mapped Drives:

- `T:\ → \\factory.wf1\DFS2\SecurityShare`
- `Y:\ → \\factory.wf1\wf1\pdmfiles\common`

Applications Verified:

- **ANPR App** – *Out of scope (outsourced)*
 - **CCTV App** – Working
 - **Easy Badge** – Working
 - **Salto (browser)** – Working
 - **Envoy (browser/iPad)** – Working
 - **MS Teams, Outlook, Office** – Working
-

7. Exceptions / Special Cases

- USB and printing exemptions applied for badge printer
 - Two iPads for Envoy and the iPhone for Teams remain unchanged
-

8. Policy & Admin Notes

- **security** migrated to Shared Accounts OU (removed from Generic Accounts OU)
 - All security staff issued with **individual AD accounts** (`firstname.lastname`)
 - Dedicated **admin PC** available for `firstname.lastname` logins when required
 - Local admin rights removed (except IT)
-

9. Validation Summary

Validation Performed by:

- Claire Silvey – Security Supervisor
- Paul Davidson – Infrastructure Engineer

Activities:

- Verified login on scoped devices (**W9442, W9443, fact-avg01**)
- Tested mapped drives and SharePoint repository migration
- Confirmed CCTV, Easy Badge, Salto, Envoy operation
- Verified badge printing and scanning functions
- Confirmed Teams “Security” tag communication working
- Validated mailbox migration and delegated access
- Verified **firstname.lastname** user accounts working with dedicated admin PC

Result: All tests passed. The **security** account is live, scoped to approved devices, and production-ready.

10. User Accounts

Existing Users with AD Accounts:

- Claire Silvey – Security Supervisor

- Marcus Begley – Security Team
- Graham Neal – Security Team
- Jordan Davies – Security Team
- Jacob Osborne – Security Team

New AD Accounts Created:

- Janet Penny – Security Team
- Alan Penny – Security Team
- Mark Howard – Security Team
- Stephen Williams – Security Team
- Kristina Striogaite – Security Team
- Graham Gibson – Security Team
- Jeremy Parson – Security Team
